**Subject:** Microsoft Settlement

This Settlement is unjust because it still gives Microsoft The ultimate control over the market. It still allows Microsoft to sell its products at an outrageous amount, because it is needed to run any programs in today's market. For example Microsoft is selling a 4 year old operating System at \$200.00, along with all the other programs at a ridiculous amount. Any Programs out there say you need Windows to run it . There are other Operating Systems that are Free but you can use a very limited amount of today's programs.. This settlement still allows Microsoft to be a monopoly. Which is against the Law.

Sincerely Rosemary Formanek, Florida
